- **FULL STACK DEVELOPER** 2023 - present
NXTWAVE
- **B.TECH MECHANICAL ENGINEERING** 2017- 2021
kakinada institute of technology and science

PROJECTS

➤ NATOURS - TOUR BOOKING API

- Built a RESTful API using Node.js, Express, MongoDB, and Mongoose, with CRUD operations, authentication, authorization, and security features.
- Implemented: filtering, sorting, pagination, Stripe payments, email notifications, and file uploads.
- Developed a server-side rendered website with Pug templates and deployed it to production.

➤ PIG GAME

- Developed a multiplayer web-based game using HTML, CSS, and JavaScript,
- Implemented robust game logic and state management to handle player turns, scoring rules, and win conditions,

➤ GUESS THE NUMBER GAME

- Developed an interactive game using HTML, CSS, and JavaScript to manage user input and game logic.
- Ensured the game was fully responsive and provided an optimal user experience across various devices and screen sizes.
